-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11 May 2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 41-54 and 59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burton et al (U.S. Patent 5,804,115 A) in combination with Knopse (U.S. Patent 3,481,133 A).

Burton et al (see the entire document, in particular, col. 1, lines 18-21 and 49-51; col. 3, lines 8-19; col. 4, lines 59-

65; col. 5, lines 26-37; Figure 1) teaches a process of making a polyamide mixed yarn, including a first polyamide which is cationic-dyeable and a second polyamide anionic dyeable, except that Burton et al does not explicitly teach simultaneously spinning from separate spinning packs (Burton et al teaches simultaneously spinning from a single spinning pack), which is taught by Knopse (see the entire document, in particular, col. 4, lines 40-49) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Burton et al in view of Knopse principally in order to combine the filaments and form a mixed filament yarn.

Response to Arguments

4. Applicant's arguments with respect to claims 41-54 and 59 have been considered but are moot in view of the new ground(s) of rejection.
